

KMF Type 3150-J6

**KMF –
Innovative sewing
automation**

**The „NEW“ Undercover
KMF Type 3150-J6 semi-automatic
production unit**

**For the sewing of exactly straight
seat panels „automotive“**

- High-performance industrial sewing machine Juki LU 2800
- Vertical looper
- Lower-thread monitor
- Upper and lower stepper-motor-driven material belt feeding
- Electronic STEHA Programme storage
- Graphic control panel
- Sewing is controlled directly via the Juki control

**Optimised functions for the
production of car seat panels**

- Semi-automatic production unit for the sewing of seat middle panels
- Simple parts positioning due to laser lines
- Exact material guiding with belt feeding
- Reduced control effort during the production process due to seam-beginning and seam-ending control
- Automatic return transport of the parts
- High process security during the simultaneous attaching of the tubular tape
- High performance – low costs
- Seam correction via graphic control panel guarantees high flexibility
